Office Action Summary	Application No. 10/804,258	Applicant(s) WEYH ET AL.	
	Examiner Mark A. Robinson	Art Unit 2872	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a microscope with a micromirror confocal pinhole, classified in class 359, subclass 368+.
- II. Claims 7 and 8, drawn to a microscope with a micromirror slit, classified in class 359, subclass 368+.
- III. Claim 9, drawn to an arrangement having a wavelength selecting micromirror, classified in class 359, subclass 368+.
- IV. Claim 10, drawn to an arrangement for an LCD pinhole, classified in class 359, subclass 368+.
- V. Claim 11, drawn to a dispersive element and switchable diaphragm, classified in class 359, subclass 368+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as

Art Unit: 2872

capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and are not disclosed as capable of being used together, e.g. the micromirror confocal pinhole of invention I operates differently and apart from the micromirror slit of invention II and the LCD pinhole of invention IV, etc.

3. Inventions (I,II,IV) and III and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claims of inventions I,II and IV evidence that the combination does not rely on the details of inventions III and V for patentability, claim 9 evidences that the combination does not rely on the details of inventions I,II,IV and V for patentability, and claim 11 evidences that the combination does not rely on the details of inventions I,II,IV and III for patentability. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
